TITLE : CONTROL METHOD OF SOLENOID
CHANGE-OVER VALVE AND
CONTROL DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To prevent occurrence of a limit cycle produced in the case of driving a solenoid change-over valve by simple on and off control.

SOLUTION: A control method of a solenoid change-over valve is to have a comparator 43 to control electrification to driving coils 23, 24 of the solenoid change-over valve and to feed back an electric current flowing in the driving coils 23, 24 to the comparator 43 through a first order lag transfer function $H_c(s)$. Hereby, time constant of the first order lag transfer function $H_c(s)$ is made 0.01 second or more and 0.33 second or less.
